Tes Teach: Create digital lessons in 5 minutes

Interactive lessons, projects, presentations and more

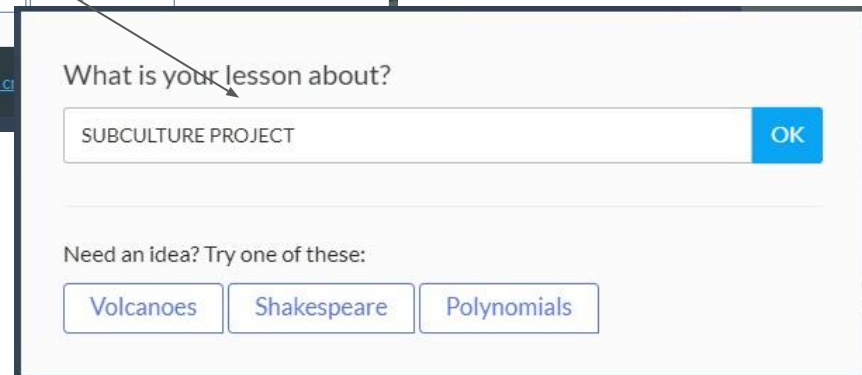

JOIN FREE

After creating your account (please use your WCPSS e-mail account), click on “New Lesson”. If you haven’t used TES Teach before, there is a tutorial video you can watch.

You will be prompted to create a title for your TES TEACH Lesson Plan.

BEST PLAY

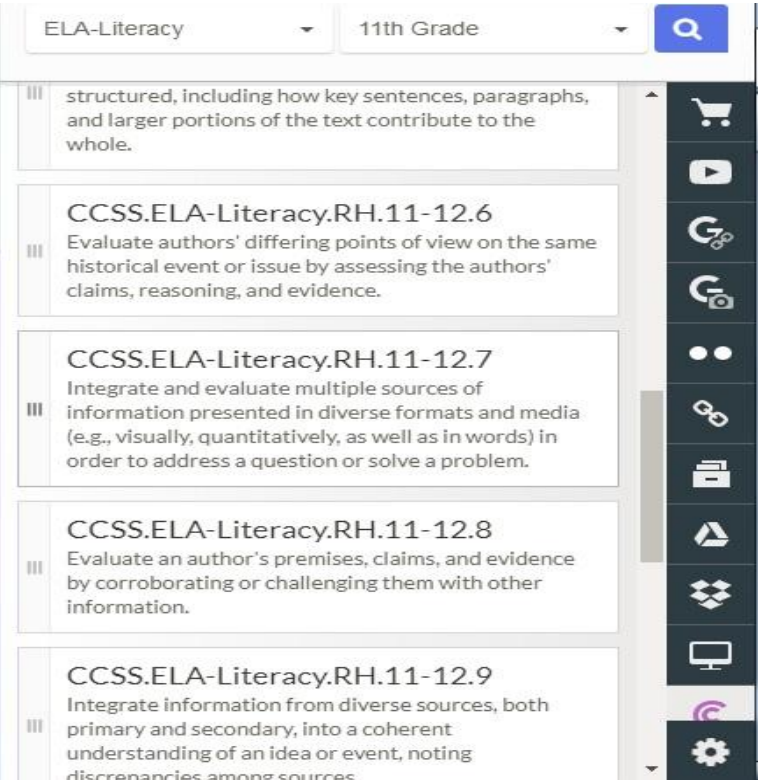

This is the template for creating your TES TEACH lesson plan. You can search different resources using the menus on the right side of the screen and drag the resources into the project, upload your own media or files, and more.

**SEARCH
TES RESOURCES****SEARCH YouTube****SEARCH Google****SEARCH Google
Images****SEARCH
Flickr****Insert Website
URL****Search MY TES
Resources****Insert from
Google Drive****Insert from
Dropbox****Upload Media/File****Common Core
Standards****Settings**

In each cell of the grid, you have the option to either drop a resource from the menus on the right of the screen. You can format the text in a manner that is very similar to Microsoft Word or Google Docs. You can also create a multiple choice quiz, which you can place at the end of the presentation.

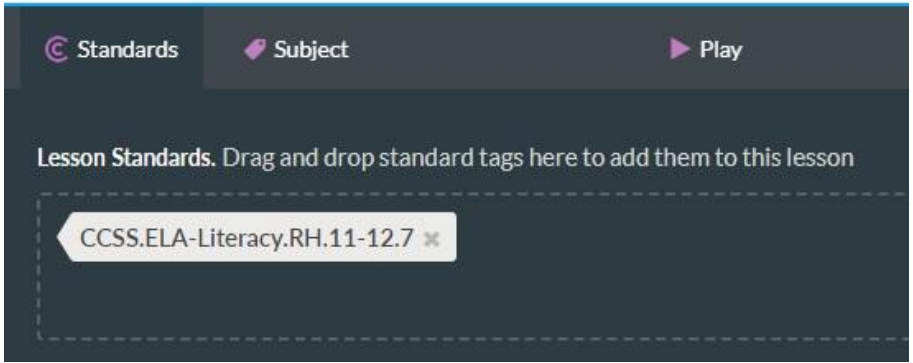

One of the menus on the right of the screen allows you to search Common Core Standards, which you can drag into the standards bar at the top of the screen.

You can drag the standards from the Common Core Standards menu into the Lesson Standards box. It will appear as a “tag” when you drop it.

When searching for videos to place in your project from YouTube, you can drag and drop the video directly onto the grid. If you want to use a video you have personally created, you will need to upload it to YouTube first, or you can upload it directly into the presentation.

You can also insert links directly from Google Search, or photos from Google Image Search. Insert website URL links, pictures, videos, presentations, and more.

If you need to add more resources to your presentation, click “ + Add Row”

When your project is completed, click “Share”.

You can share your presentation via URL link; or through Google Classroom, Twitter, Embed Code, Email, Facebook, or QR Code.
